Marko Pogrebisnky (2147110)

Supervisor:

Wido de Kruijf (IPO)
Ewout Boks (ESE)

Client:

Marco Pieck
Marieke de Vogel

1. Start

1. The admin sets up the board and opens the server for you.
2. Wait until the screen shows the game is ready.
3. Make sure all tiles are in their start positions before you begin.

2. Play

1. You start at 100%.
2. Flip a tile to open its question.
3. Read the question and answers on screen, then choose an answer.
4. A correct answer raises your score, a wrong answer lowers it.
5. The LED strip shows your score, blue for points held, red for points lost.
6. Continue to the next tile and repeat.
7. You win by staying above 0% score and answering all questions.
8. You lose by reaching 0%.

3. Good to know

- You flip only one tile at a time.
- If a tile is moved by accident, the screen pauses and tells you to fix the tile – Return it to continue.
- User data is saved, specifically, time, name (optional), age (optional) and score.

4. Finish

5. At the end screen you may enter your name and age (optional)
6. Press record your score and restart the game.
7. Set the tiles back in their starting position before you leave.
